I'm a UX/UI designer who believes complexity isn't the problem confusion is. My work is removing the second while respecting the first: taking data-heavy interfaces, dense workflows and multi-device systems in enterprise environments and turning them into something people can actually move through. I pair user research with a clear read on business goals and technical constraints, so solutions hold up across real operational contexts and international audiences improving usability, onboarding and how confidently people act on what they see.

Self-Employed — UX/UI Designer and Research (full-time)

(Jun 2026 - Now)

- **Designed and improved UX logic across different industries, including ERP, SaaS, retail and e-commerce**, building new processes and interaction flows from existing operations.
- **Ran user research to guide product decisions,** identifying friction points, observing how users adapt to new systems, and surfacing what they value and feel comfortable using.
- **Turned session recordings and research into actionable, finished documentation for Unwrap,** a product analytics platform, validating design decisions and scaling what works.
- **Ran post-implementation QA,** catching where designs diverged from intent and clearly flagging fixes to developers and the wider team to keep the product experience consistent end to end.
- **Delivered under real business and technical constraints,** accounting for each client's goals, industry and the demands of combined hardware/software products.

Knapp (Epilog) — Senior UX/UI Designer and Research (full-time)

(Apr 2023 - Jun 2026)

- **Design and maintain a robust component library (250+ components),** ensuring consistency, reusability, and efficient design workflows across the product.
- **Accelerated design and development processes by 63%,** enhancing efficiency and continuity across the entire company.
- **Conducted UX research across global user groups** and translated cross-cultural insights into clear, decision-ready metrics.
- **Analysed friction points in the flows for clients Walmart and Würth** and delivered clear fixes to streamline operations.
- **Converted an old desktop product into a new web-based generation** by analysing existing workflows, simplifying the logic and adapting the product for a fully web environment.
- **Improved user decision clarity by 33%** by restructuring screens and helping users understand and act on data more confidently.
- **Developed a design system for pilot projects,** boosting consistency and delivery speed by 10%.
- **Effectively communicate with clients and teams across the world,** adapting to different communication styles, cultures, and workflows.
- **Create wireframes and high-fidelity interactive prototypes** for complex ERP and SaaS platforms, focusing on clarity, scalability, and user flow optimisation.
- **Created and led a scalable multi-device design system** that delivers a unified experience for enterprise environments.

Cirriosoft — UX/UI Designer (full-time)

(Jul 2021 - Nov 2022)

- **Researched how HR professionals use diagnostic tools,** conducting interviews and usability tests to understand how they read, compare, and use assessment results, and improving how information is structured and presented.
- **Identified where users struggled to understand test results,** improving clarity and simplifying the presentation to help HR teams make faster and more confident decisions.

Freelance UX/UI Designer — (Occasionally)

(Jul 2022 - Now)

- **Supported the American Heart Association for 4 years** by designing educational graphics and print materials that helped communicate complex health information in a clear, accessible way for diverse audiences.
- **Led marketing strategy and visual execution as a freelance partner for Cluekit d.o.o.,** planning campaigns and delivering all key visual materials across digital and print.

SKILLS

Programs

Figma (Wireframing, Prototyping, Auto Layout Component Libraries), HTML, CSS, Tailwind CSS, JavaScript, Framer, Adobe, DaVinci Resolve, Jira, Azure, SAP, Notion, Google Analytics, Fullstory, Procreate, GitHub, ChatGPT, Claude, Perplexity

Languages

- English: Proficient (C1)
- German: Native
- Slovenian: Native

EDUCATION

Faculty of design

Bachelor's Degree
Ljubljana, Slovenia
